NAME OF PERSON	Mohamed Jamac
NATIONALITY	Dutch
HOME LOCATION	Leicester, England
POSITION	Assistant Signalling Design Engineer
QUALIFICATIONS & TRAINING	BEng (Hons) Mechanical Engineering - 2017 MSc Mechanical Engineering – 2019 Institution of Mechanical Engineers - 2019 Basic Signalling 1 – 2021 Basic Signalling 2 – 2021 Developing Personal Impact - 2021 Basic Signalling Technology Training Course - 2022 Correlation Training Course - 2022 Fire Marshall – 2022 First Aider – 2022
KEY EXPERIENCE –	An introduction to railway was presented to myself after joining Colas Rail in 2020 on the Graduate Program, this graduate scheme was catered for me to develop and gain significant knowledge as I had no experience/ knowledge of this industry after completing my masters in engineering. This development consisted of attending courses to enhance my knowledge such as basic Signalling 1 & 2 and basic Signalling technology. Since joining Colas, I have participated in few projects such as the Gloucester life extension which consists of new location design, existing location design. Another project I was involved in was the OMSL ground plans level crossings which consists of altering current design to show pedestrian crossings, new signs and calculating stopping distances.

EXPERIENCE

November 2020 – September 2023 – Assitant Signalling Design Engineer

- Berks&Hants New Location Design
- OMSL Ground Plans
- Correlating
- Correlation Updates
- Site Visit (Installation Team)
- Site Visit (Testing Team)
- Gloucester Life Extension New Location Design
- Gloucester Life Extension Existing Location Design

September 2019 – November – PPI Case Handler, Customer Service, Contractor, Santander

- Investigating PPI claims made by customers and determine the amount of redress payment due.
- Liaising with Claims Management companies and reviewing claims
- Processing payments and updating accounts

January 2018 – May 2018 – Student Formula, Design Engineer, Internship, De Montfort University

- Part of a group that designed and manufactured a student F1 car.
- Responsible for the oversight of the project in my second year, from the design, testing, service, parts, mainten electric and testing of the car.
- Travelled around the UK racing other student F1 cars.

June 2015 – September 2015 – Assistant Technical Clerk, Jaguar Land Rover

- Responsible for the timely procurement of engine parts of prototype engines
- Project managed the supply of parts to key personnel, ensuring that any shortages are delivered promptly, with contingency plans in place to avoid customer detriment.
